EDUCATION

McMaster University

Bachelor's in Computer Science | GPA: 3.9

Hamilton, Ontario

September 2022 - April 2026

- **Awards:** The McMaster University Award of Excellence, Deans' Honour List (2023, 2024, 2025)
- **Courses:** Data Structures and Algorithms, Databases, Computer Architecture, Operating Systems, Machine Learning

EXPERIENCE

DataAnnotation

AI Coding Evaluator

Remote

November 2025 - Present

- Improve LLM code generation through RLHF across Python, JavaScript, and Java by evaluating 50+ model outputs weekly and delivering structured feedback on correctness, efficiency, and security
- Reduce AI agent failure rates on full-stack tasks by designing 100+ complex multi-step prompts targeting API design, database schema modeling, CI/CD configuration, and containerized deployment scenarios

Future Gulf

Software Engineer Intern

Remote

May 2025 - August 2025

- Architected and deployed a full-stack e-commerce platform using Next.js, React, TypeScript, and Firebase, implementing real-time inventory tracking and product management across 200+ SKUs
- Led end-to-end development of a multi-brand corporate website using HTML, CSS, and JavaScript, driving a 35% increase in user engagement through interactive product showcases

Google Developer Groups

Full-Stack Developer

Hamilton, Ontario

September 2024 - April 2025

- Designed high-fidelity UI/UX mockups following mobile-first design principles in Figma and translated them into a cross-platform mobile application using React Native and TailwindCSS
- Developed a real-time capacity management backend on GCP for the university gym, handling OAuth 2.0 authentication and push notification alerts, reducing peak-hour overcrowding for 100+ active users

PROJECTS

SimuTrade

July 2024

- Engineered a full-stack real-time candlestick trading simulator using Next.js, React, and TailwindCSS with WebSockets, enabling users to practice technical analysis strategies in a risk-free environment
- Built a comprehensive analytics dashboard with MongoDB and NextAuth.js, tracking performance metrics such as P/L curves, Sharpe ratio, win rate, average hold time, and position sizing, increasing user retention by 40%

Speedster

June 2024

- Published and maintained a Chromium browser extension using TypeScript and the Chrome Extensions API, reaching 100+ daily active users with a 5-star rating on the Edge Add-ons Store
- Created a minimalist user interface and persistent state management system using Chrome Storage API to synchronize playback speed preferences across all browser tabs, boosting average user productivity by 50%

TECHNICAL SKILLS

- **Communication:** English, French, Arabic
- **Languages:** TypeScript, JavaScript, Python, Java, SQL, HTML, CSS, Bash
- **Libraries/Frameworks:** Next.js, React, Express.js, Redux, Tailwind CSS
- **Tools/Platforms:** Node.js, AWS, Redis, PostgreSQL, Firebase, Git, GitHub Actions, Docker, Kubernetes
